## Centennial® Style 5101

Thank you for purchasing a Shakespeare antenna product. Customer comments are welcome. Before installing, please study the diagram and check parts supplied against those listed.

#### IMPORTANT! Please read all instructions before installing.

The Centennial® Style 5101 is an end-fed VHF marine antenna of 8' (2.4 m) overall length with matching stub and a chrome-plated brass ferrule.

Tools required: Soldering iron (40-watt min., 75-watt max.), resin core solder, pocket knife, wire cutters.

#### **Installation Instructions**

Choose a mounting location that is as high as possible, as free as possible from obstructions, and as far as possible from other antennas.

- 1. Mount the antenna using a Shakespeare Style 4187 Ratchet Mount (sold separately), or use a Shakespeare Style 4008 Extension Mast and a Shakespeare Style 410-R mounting kit (each sold separately) to form a 16' antenna system. Follow the directions included with the mount you choose.
- 2. Route the cable to your transceiver, keeping it as far as possible from other electrical equipment and cables. Any excess cable should be rolled in a coil of at least 8" diameter and stowed in an out-of-the-way place, away from other electrical cabling. Install the PL-259 connector (supplied) according to the instructions packed with the connector.

This antenna requires no external or internal ground system, and works equally well on fiberglass, wood, or metal boats.

#### Cleaning instructions

To clean the antenna, use mild dishwashing liquid (one that is not harsh to the hands and *without* ammonia) in lukewarm water.

#### **Tech Tips:**

This antenna will read "open circuit" when tested with an ohm meter or continuity tester.

The 50-ohm coaxial cable attached can be shortened as required. However, it should remain at least 3 feet (0.9 m) in length, measured from the point where the cable exits the antenna.

# **Supplied Parts** 1 Antenna assembly 1 PL-259 connector with instructions WARNING: Do not let paint solvents, cleaning solvents, or adhesive caulking come in contact with the antenna. Chemicals in these materials might destroy the finish. **Antenna** entennial VHF MARINE Chrome-plated brass ferrule Cable
