

STANDARD WIPER KIT

FEATURES

- Motor with adjustable sweep angle of 80° or 110°
- Adjustable left or right self-parking
- Standard adjustment 80° - left self-parking
- Motor shaft and mounting plate in stainless steel
- Arm/blade combination up to 14" x 14"

Wiring Instructions Standard Motor - Black

(Customer Supplies Wires)
Connect appropriate wire, following the guide provided on motor.
Note: "S" is "Self Park."

Standard Motor (Customer Supplies Wires)

Safety note: Be sure to use appropriate wire gauge to support the voltage and distance from your power source.

Instructions to Install Wiper Arm

- Use an allen wrench (not included) to loosen set screw if needed.
- Slide arm over shaft and tighten set screw

Instruction to adjust left or right self-parking

- Remove the motor base cover
- Locate the small plastic cam and gently lift the cam off the self park shaft.
- Rotate the cam 180° so it is facing the opposite direction. (You may need to gently pull back the metal contact plate.)
- Replace the cam over the self park shaft
- Replace cover

Instruction to change sweep angle 80° or 110°

- Remove cover plate
- Lift sweep mechanism from gear and move to the opening closest to the center of gear (for 110°)
- Reposition shaft arm on underside of cover plate so that it fits into sweep angle cam.
- Reposition gasket and reattach cover plate
