

ANT WIRELESS STEREO REMOTE

CODE:

ARX70B

ARX70W

KEY FEATURES

WIRELESS REMOTE CONTROL

Enjoy the freedom to control your audio entertainment from wherever you are, whether you are on the boat or in the water, depending on where you install your ARX70 wireless remote control. The ARX70 utilizes ANT™ technology for wireless remote control of your Fusion ANT-enabled marine stereo. Wireless audio control has never been so easy.

This remote can also be used across a variety of Fusion ANT enabled products including the 70 Series, 755 Series, StereoActive, Apollo RA770, Panel-Stereo, MS-BB100 and RV-IN1501.

IPX6 AND IPX7 WATER RESISTANT

Rated IPX6 and IPX7 water resistant, the ARX70 ANT Remote is designed for use anywhere on board, in both dry and wet zones. This makes it ideal for the swim platform, bow rider or transom fitment on your boat. With its strong water resistance rating, you can enjoy peace of mind that your remote is built to last season after season wherever it is installed on board.

ZONE CONTROL READY

The ARX70 can interface with compatible Fusion stereos and act as a media controller for a single zone. To control multiple zones, several ARX70s can be installed with one or more in each zone.

BATTERY POWERED

The ARX70 is powered by a CR2032 battery, with a typical 1-year battery life. The battery is easily replaceable, making the ARX70 simple to maintain.

COMPACT, LOW PROFILE DESIGN

The compact, low profile design makes the ARX70 easy to fit in many different areas, for installation where it is most convenient. The ARX70 is designed to blend in with the aesthetics of any vessel, ensuring you do not need to compromise on style to have wireless remote functionality on board.

EASY TO USE

With rubberised tactile buttons and a light-bar, the ARX70 is simple and easy to use, even in both wet and low light conditions. The LED lights in the light-bar provide essential user feedback as you control your audio playback.

EASY TO MOUNT

A semi-permanent adhesive, VHB tape, is used to mount the ARX70 on to a variety of surfaces. This makes the ARX70 quick and easy to mount in many locations with the advantage of not having to drill holes, use screws or run cabling.

TWO COLORS AVAILABLE

The ARX70 ANT Remote is available in both black and white models, letting you choose the color to best suit the design of your vessel.
