

## SR-L SERIES MARINE LIGHT BAR

Accent lighting is an easy way to customize the look of any vehicle, and RIGID now offers a new way to add style and function with the new SR-L Series Light Bar. This new 20 inch Light Bar offers users the latest LED technology paired with advanced optics to provide an ultra-wide 70-degree beam pattern suitable for lighting up the trail ahead. In addition, the SR-L Series Light Bar offers halo backlighting available in three colors: red, blue, or white. The halo provides a stylish accent color to any custom vehicle build, while the hidden mounting hardware and glossy outer trim further adds to the light bar's sleek look. A 3-position switch is included, allowing the user to easily switch between the halo accent lighting to the forward-projecting light. The SR-L Series offers the same legendary RIGID build quality as the rest of the company's products, from the high-grade aluminum housing to the impact resistant polycarbonate lens. Packed with power and style, the SR-L Series makes it easier than ever to Own the Night.
