

Fact Sheet

Barton Wincher

Part #s 21641, 21642, 21643, 21644

The Barton Wincher is a specially designed rubber moulding which converts your standard winch into a self tailing winch. This tried and tested design has been a firm favorite with Sailors for many years.

The Wincher works by gripping the rope when the drum is fully loaded and under tension, peeling off the line from the underside of the Wincher as you winch to give a true self tailing motion. Cleating is achieved by locking the sheet into the Wincher's ribbed central groove.

Available in 4 sizes for winch drum diameters 2 1/2" to 4"

Part #21641 Small Wincher – Fits 2 ½" – 2 ¾" drum diameter

Winch model examples: Barton 21200, 21202, 21202. Antal W8. Lewmar 7, 7ct, 8, 12ct, 16. Harken B8, B16.2. Lewmar 24. Arco 8.

Part #21642 Medium Wincher - Fits 2 ¾" - 3" drum diameter

Winch model examples: Antal W9, W16, W30. Lewmar 30,40. Harken B32.2, B40.2. Arco 30. Enkes 20. Barlow 15, 16, 22, 23.

Part #21643 Large Wincher – Fits 3" – 3 ½" drum diameter

Winch model examples: Antal W42. Lewmar 42, 43 (new). Barient 22, 26.

Part #21644 Extra Large Wincher – Fits 3 1/2" – 4" drum diameter

Winch model examples: Antal W44, W47, W48. Harken B42.2. Barlow 25, 26. Lewmar 43 (old)
